SUSTAINABLE SUSTAINABILITY EFFORTS

We are dedicated to being sensible frontrunners on the environmental responsibility. If we provide timeless, lasting and functional quality designs, we know nature will prevail, as will UIMAGE.

GIVING BACK TO NATURE

We acknowledge that selling furniture and lighting can never be 100% sustainable, but we want to make an extra effort for the environment. We have entered a collaboration with the NGO One Tree Planted, so every time one of our designs made from wood is sold, we are **planting a tree**. Furthermore, we are drafting a partnership with a Danish NGO cleaning the ocean and **minimizing plastic pollution**.

DURABLE QUALITY MATERIALS

We always choose quality materials to ensure **prolonged lifecycles** of our designs so you can lead a sustainable lifestyle with care for the environment.

INTERCHANGEABLE ELEMENTS

As the times change, the designs can change accordingly. Two years have passed and suddenly you want leather on your dining-chairs instead of velour, then simply **interchange the velour with leather in a few minutes**. Same thing with our lounge chairs, cabinets and other responsible designs. This means that you can **add new life** to the design and your interior without having to buy an entirely new furniture piece, saving the world resources.

MULTIFUNCTIONAL AND FLEXIBLE

Why have a table lamp or a side-table and not include a USB or wireless charger as well? Why not make room for storage where space is vacant anyway? UIMAGE not only answers these questions, but make it happen. One of the key aspects of the furniture and lighting designs at UIMAGE is multiple functions and flexibility. Designing with more than one function in mind is a sustainable mindset as it **reduces the number of products you need** to buy to get a complete setting for your space.

COMPACT AND REUSABLE PACKAGING

To minimize the packaging waste, we have devised a new packaging concept **repurposing the packaging** to be used as beautiful **storage boxes** afterwards, without any UIMAGE branding. We are replacing all foam and plastic in our packaging with an **eco-friendly** honeycomb cardboard to **minimise the plastic waste** when purchasing an UIMAGE design. This will be implemented continuously from January 2020.

RECYCLING

All our designs can be **separated into key elements** for recycling and worn parts can be replaced, to extend the life of the designs.

EOS

Designed by Søren Ravn Christensen

SOFT ELEGANCE FROM NATURE

The Eos lampshade draws its force and beauty from the earth tones of the Nordic landscape. A natural colour palette that creates a warm and welcoming atmosphere – this is the quintessence of the Eos family! With a neutral and harmonious colour, the Eos lampshade will perfectly suit any minimalist interior design, adding a sophisticated and elegant touch. Either in a modern living room or in a classic bedroom, this lampshade will bring a trendy yet timeless look and a soothing vibe to your space.

“The Eos blends with the room and brings out the best in it. It fits perfectly in a light environment without many impressions, with, for example, only earth colours or dark wooden tones”, explains Søren Ravn Christensen, Founder and Chief Creative Developer.

JAZZ

Designed by Magnus Nero & Ingemar Jönsson

ORGANIC SHADE OF THE NORDIC NATURE

Nothing makes you feel closer to the nature than the scent of wood, reminding us to slow down our lives and breathe, even if it's just for a moment. Made from oak the lampshade will bring the Nordic tones of nature into the interior. Crafted from an exclusive 3D veneer technology with an organic shape that will add warmth and vitality to the home.

The lampshade is inspired by the flowing lines found in a flourishing frangipani flower and a classical gramophone horn, hence the name. Jazz is designed by the design duo Magnus Nero and Ingemar Jönsson, with an international design profile working for Tom Dixon and Artek in the past. Use it as a pendant above the dining table, on Champagne floor, on the Willow family or simply placed directly on the floor creating a strong statement in the interior.

ACORN

Designed by Jacob Rudbeck

TAKE A WALK THROUGH THE PEACEFUL FORESTS

How many times have you walked through a peaceful forest, breathed in the fresh crisp air and listened to the sound of the wind playing with the leaves, thinking that this is a memory you want to keep? UIMAGE aims to make sure that its customers can keep this picturesque image close to their hearts and into their homes with the Acorn family of lampshades.

Inspired by the humble acorn, the pendant light offers a warm glow, perfect for living rooms or kitchens, bathrooms and bedrooms. SINE

Designed by Miklós Leits

A PERPETUAL DANCE OF SYMMETRY AND ASYMMETRY

See, touch, feel, embrace. It's easy to let your mind wander and your eyes undulate to the rhythm of the Sine, a lampshade designed to lure and engage your senses. Its harmonious organic pattern contrasts symmetry and asymmetry, dark and light, grey and white, ups and downs, creating a remarkably different look depending on the angle from which it's viewed, and imprinting an apparent motion and a dynamic vibe to the lamp.

The tactile sense is as much delighted as the sight sense. The smooth layer of felt conveys a distinctive character and creates a cosy feel, evocative of the Nordic style and philosophy. Exquisite, intrinsically simple, yet with an attitude twist, Sine comes as a flat-packed lampshade that can be assembled without glue or any tools. Hidden zippers along the edges transform the 2D flat geometric shapes into a stunning 3D silhouette.

With an exclusive, yet playful design, and a completely glare-free glow, this lampshade can be placed in any spot, in any environment. All you have to do is to see, touch, feel, love.

TIME FLIES | CHAIR

Designed by

A CUSTOMISABLE CHAIR WITH A SUSTAINABLE EDGE

The upholstered chair is customisable and provides the flexibility of changing the upholstery yourself, so you can change the visual style without having to buy a new chair, securing a sustainable life of the design.

The chair secures comfort from all sitting positions making the time fly during dinner with friends – hence the name Time Flies™. Your ergonomic sitting position typically changes as the evening evolves: From sitting straight as you eat your dinner, to leaning your back more casually later in the evening, or turning your body as you go into a deep conversation with the person sitting next to you. The chair is designed with a top rail easing into armrests, securing a soft and steady back support from all angles, leaving space for your legs underneath the armrests as you turn your body during the evening.

You can choose from six carefully selected bespoke fabrics including velvet, leather and various woven textiles. Choose to go for one colour or mix and match the colours for the seat and backrest, making the style of the chair flexible and durable over time. The legs will be available in chrome, brass and black extending the flexibility even further.

FLOW | SHELF

Designed by Lasse Sortkjær

A FLOWING SHELF FOR THE WALL

Flow™, the new shelf that is flowing like waves on the wall – hence the name. Flow™ is the result of a designer's play with composition and materials, creating a strong visual attraction, while providing a steady functionality. A humble yet unconventional design.

"I wanted to challenge and confine the use of materials in the design to see how little is enough. My inspiration was trees growing in the forest. Trees are strong at the stem, but light and delicate at the twigs, just like Flow™" – Lasse Sortkjær, designer.

Flow™ is an artistic design piece and just by putting a few of your favorite objects on show, you will create a visual attraction to your living space. Flow™ comes in solid black stained ash, where the natural wooden surface shows, adding a warm appearance to the design.

DUNES | Leather from Sorensen Leather

The DUNES collection has received the Nordic Swan Ecolabel. A highly-respected certification verifying that it meets their rigorous requirements regarding the environment, use of energy and resources. A special process involving sanding, buffing and applying a special type of leather oil to the surface gives it that almost velvety

touch. At the same time, DUNES boasts a matt look that's raw with a touch of understated elegance. Part of DUNES' extra appeal are the subtle, natural markings which bring a unique personality to each hide. The five colours we feature will also vary from hide to hide and with each individual hide. Watch for a delicious patina

that will appear over time as a result of the leather's exposure to daylight, interior lighting and usage. In fact, the more you use DUNES, the more the leather becomes shinier and smoother.

Re-wool | Upholstery from Kvadrat

Crafted using 45% recycled wool, Re-wool is a rich upholstery textile with a sustainable profile. The textile is partly made by reusing scraps from Kvadrat's yarn spinners in the UK. It is designed by Margrethe Odgaard. 'The

idea was to create a both honest and environmentally friendly – textile with a poetic feel by recycling leftover material from Kvadrat's own production', explains Margrethe Odgaard. Reminiscent of colourful stitchings on a

darker background, Re-wool features exceptional depth of colour, creating a dynamic play on the textile's surface when applied to furniture.
