Vela is a collection designed by the architect Ramón Esteve for Vondom. This wide collection of outdoor furniture and planters provides the comfort and warmth of the indoor furniture without losing its original characteristics. Vela is a sectional system with a basic geometry that finds its singularity in the balance of the proportions. All items can be combined together in order to fit in any space. That flat volumes seem to float a few inches off the ground and when illuminated become light architectures. Vondom offers this collection in different finishings and can incorporate light. This ephemeral installation in the building “Veles e Vents” by the prestigious architects David Chipperfield and Fermín Vázquez was designed by Ramón Esteve Studio.

Vela es una colección diseñada por el arquitecto Ramón Esteve para Vondom. Esta extensa colección de muebles y maceteros para exterior busca ofrecer el confort y la calidez de los muebles de interior sin perder sus cualidades de origen. Vela es un sistema modular con una geometría elemental prismática que basa su singularidad en el equilibrio de sus proporciones. Los elementos se pueden combinar entre sí para poder convivir en cualquier espacio. Sus volúmenes rotundos parecen flotar a unos centímetros del suelo y cuando se iluminan se transforman en arquitecturas livianas. Vondom ofrece esta colección acabados mate, brillo o de color y está preparada para incorporar luz. Esta instalación efímera en el edificio “Veles e Vents” de los prestigiosos arquitectos David Chipperfield y Fermín Vázquez fué ideada por Ramón Esteve Estudio.

DMX LIGHT CONTROL

The new DMX (Digital Multiplex) range is specially for professionals who want to create special environments, events, entertainment or facilities. A new way to understand the furniture in harmony with the light and sounds environments that can be created fully adapted to the needs of each particular moment. Bars, tables, sofas, planters,... a vast majority of our products incorporate RGB LED inside and you can have then now with this new system. DMX is a protocol used for the electronic control of entertainment lightning, enabling communication between the table-control, their own lights and the light sources.

house_by_A_cero

In need of a thorough update (both internally and externally) of their existing home, its owners changed their originally magnificent home both aesthetically and functionally. All new furniture has been designed by A-cero, like the Rest Collection for Vondom, except items already belonging to the property. The white color is placed like a guide of the design project, which breaks up some of the brown tones, following a chromatic guideline.

Se trata de una reforma integral de una vivienda, cuyos propietarios encontraron la necesidad de renovar tanto externa como internamente para actualizar su imagen. Esta es una magnífica casa en un principio, pero había acusado el paso del tiempo, tanto estética como funcionalmente necesitaba un cambio. Todo el nuevo mobiliario ha sido diseñado por A-cero, al igual que la colección de Vondom Rest, excepto los elementos que ya pertenecían a la propiedad. El blanco se propone como hilo conductor del proyecto de diseño interior que rompe con algunos toques de marrón.

Biscarrosse is a small seaside village, about one hour drive south of Bourdeaux. Here are all the typical surf and seaside shops, small carousels, restaurants and bars. Just before you reach the beachfront with magnificent view across the Bay of Biscaya, stands the newly restored Le Grand Hotel de a Plage. Reopened in July 2013, the hotel shiny white cube like exterior is hard to miss. Facing the beachfront is the stylish lounge, with a bar surrounded by white, VONDOM minimalistic furniture, overlooking the Atlantic Ocean.

El_Aulario

The Aulario is a six-level building interconnected by a large central space that illuminates each level. Its architecture is characterized by a succession of tiered concrete beams that delineate its various sitting rooms and auditoriums. Stefano Giovannoni and Elisa Gargan's STONE collection populates each level. Their delicate organic silhouettes break away from the building's rectilinear forms, creating a balance of shapes that elegantly become part of the project's interior design backdrop. The collection's harmonious greyish tones, both in anthracite and steel, set off a contrast amongst gradations of red, creating a space filled with warmth, dynamism, and vitality.

El Aulario es un edificio compuesto por 6 niveles interconectados a través de un vacío central que los ilumina. Su arquitectura se caracteriza por la sucesión de vigas de hormigón dispuestas de forma escalonada que conforman las distintas salas auditorio. Los conjuntos de mobiliario STONE by Stefano Giovannoni y Elisa Gargan dispuestos en cada uno de los niveles forman parte del interiorismo de este proyecto. Su silueta delicada y elegante de origen orgánico rompe con la linealidad de la arquitectura. La armonía cromática basada en tonalidades grisáceas mediante los colores antracita y acero, se ve alterada mediante matices rojizos que buscan el contraste, aportando calidez, dinamismo y vitalidad al espacio.

“Nhow Berlin hotel celebrates Berlin's modern zeitgeist and connects it to the rest of the world by creating a technorganic land of data-driven art and spaces. Set on the Spree River, the old line between East and West Berlin, the nhow hotel bridges the digital age of information and the physical and spiritual needs of visitors. The result is a music inspired hotel where sound is tactile, and a true immersive experience of color, texture, and vibrancy...”

“Nhow hotel de Berlín celebra el moderno *zeitgeist* berlinés y lo conecta con el resto del mundo mediante la creación de un universo technorgánico basado en una estética “data-driven” y una concepción artística del espacio. Ubicado a orillas del río Spree, la antigua línea entre Berlín Oriental y Occidental, el hotel Nhow abraza la era digital de la información y se orienta a las necesidades físicas y espirituales de los visitantes. Siempre me pregunto si el mundo físico es, tan seductor, tan conectivo, tan inspirador, y personalizable como el mundo digital. Eso es lo que he tratado de lograr con nhow Hotel Berlin, un espacio anfibio que convive con el mundo “infosthetic”.
